

The New STAYPUT™ SPIN CUT TOOL

NOW AVAILABLE

NEW PRODUCT DESCRIPTION

The Stayput™ Spin Cut Tool is designed to spin and cut holes in fabric. There are 5 sizes available (see the table below). The Tools are sold with a nylon (HDPE) cutting board and are available individually or as a set. Three of the Spin Cut Tools available are matched to the holes required by the Stayput™ Press Clip, Stayput™ Shock Cord Loops, Stayput™ Marquee Hooks, Stayput™ Rope Track Slides and #4 eyelets.

4mm	Suits metal press studs
5mm	Suits Stayput™ Press Clip,
6mm (1/4")	Suits Stayput™ Shock Cord Loops, Marquee Hooks and Rope Track Slides
9.5mm (3/8")	Suits #4 eyelets
11mm (7/16")	Suits #6 eyelets

WHY WAS IT DESIGNED?

The Stayput™ Spin Cut Tool was developed as a low impact means of making a hole in fabric. There is no need to have 3 hands to try and hold a block of wood, your hole punch and hammer to make a hole, and it can be safely used against a boat cabin or car body without the risk of causing damage. It also cuts nicely through tough fabrics like webbing.

HOW DOES IT WORK AND WHERE CAN IT BE USED?

The tool is simply attached to your battery drill. While holding the nylon cutting board behind the fabric, gently push the tool against the fabric to 'spin cut' your hole. Making a hole in fabric, particularly while working in the field is now an easy one person job making it ideal for mobile fabric workers, particularly on those occasions where it is better to complete the job without the need to remove it.

KEY QUALITIES/BENEFITS

- Quick and Easy for one person to use
- Low Impact
- Ideal for use on site
